Credit	3	Course Number	TIS1002
Class Time	Tue/Thu 10:30-11:45	Enrollment Eligibility	All Freshmen at the Geppert School of International Studies

Instructor	Name: Iegor Vyshnevskiy	Homepage: https://iegor-vy.github.io/
	E-mail: ievys_h_at_sogang_dot_ac_dot_kr	Telephone: 02-710-2562
	Office: J721 Office Hours: TBU Additional Availability: Online meetings available upon request via email	

I. Course Overview

1. Description

This course is designed as a very introductory exploration of economics, tailored for freshmen students at the Geppert School, regardless of their intended major. This introductory course serves as a foundational exploration of essential economic concepts crucial to the International Commerce Track, enriched by insightful case studies. Students will be able to understand the decision-making of consumers and firms, price theory across various market structures, measures and models of aggregate economic activities, and macroeconomic policy tools.

2. Prerequisites

There are no specific prerequisites, but students may find it helpful to have completed the Mathematical Methods for International Commerce (TIS1005) course beforehand. However, these two courses are designed to complement each other, regardless of the order in which they are taken.

3. Course Format (%)

Lecture	Discussion	Experiment /Practicum	Field study	Presentations	Other
80 %	20%	%	%	%	%

4. Evaluation (%)

Mid-term Exam	Final exam	Quizzes	Presentations	Group Activities	Individual Assignments	Participation	Other
30 %	30 %	%	%	20%	10 %	10 %	%

Geppert School students will be evaluated separately from students from other departments and exchange students.

II. Course Objectives

The main objective is to provide a basic understanding of fundamental economic concepts and to introduce the ways in which economists analyze and think about economic issues. By the end of the course, students will have a foundational grasp of economic principles and will be able to apply this knowledge to everyday situations, even if they do not pursue further studies in the International Commerce Track.

III. Course Format

(* In detail)

* This course is planned to be partially conducted as a flipped learning course. Some class time will be used for in-class activities. Students should prepare the activities before class by watching video lectures online. What is flipped learning? Please see [FLIP_handout_FNL_Web.pdf](#)

- Pre-class online preview lecture (<20~30 min.) + pre-class indiv. assignment (Cyber Campus)
- In-class lectures and flipped learning type group exercises
- Post-class reflection group report + indiv. problem sets (<10 short questions, Cyber Campus)
- TA Q&A sessions for exams

IV. Course Requirements and Grading Criteria

- All assignments should be submitted by the beginning of classes on due dates.
- On national or university holidays (Chuseok holidays), recorded lectures will be provided on the course website. Students should complete watching the lecture by the end of the week.

V. Course Policies

- The University's Honor Code and Academic integrity will be strictly reflected. Any plagiarism will result in not only zero credit for this assignment but also a fail (F-grade) in this course.
- No photos or video are allowed in class. All lecture slides are provided before classes start.
- COMMUNICATION: Students are strongly recommended to have all class-related discussions and Q&A through the Learning Management System (LMS). The quicker you begin asking questions here (rather than via emails), the quicker you'll benefit from the collective knowledge of your classmates and TA, and me together. I encourage you to ask questions when you're struggling to understand a concept—you can even do so anonymously. Also, you can leave your own answers and I can endorse your answers as good answers. Notice that you can leave your question for me privately.

VI. Materials and References

Lecture slides (available at the Cyber Campus)

Bowles, Samuel, Wendy Carlin, Margaret Stevens, and Eileen Tipoe (2024) *The Economy 2.0: Economics for a Changing World*

Free e-book available at <https://www.core-econ.org/the-economy/>

If you want to possess a printed book, you can order "The Economy 2.0: Microeconomics" from Amazon.com

VII. Course Schedule
